

1.18 Display Mounting Kits:

The **Merlin** AOA display can be mounted in the pilot's peripheral vision under the glare shield and can be mounted on top by purchasing either of the 2 optional mounting kits; a solid mount or swivel kit which compensates for curvature of the glare shield and accurate positioning in a horizontal orientation.

Glare Shield Mounting Kit

**NOT TO SCALE**

The Merlin display was designed to be viewed in the pilot's peripheral view without looking down when flying the aircraft. There are 3 mounting options to assist in any aircraft installation.
